RE: Synthetic Minor Permit

Dear Mr. Kato:

Unisia of Georgia Corporation was issued Georgia Air Quality Permit No. 3714-147-12500 on July 16, 1997, for the construction and operation of an automobile parts manufacturing facility located at 1000 Unisia Way in Monroe, Georgia. This permit contains the necessary conditions to limit your potential emissions below applicable Title V thresholds. Therefore, your current permit is considered to be a practically enforceable Synthetic Minor Permit.

A copy of Georgia Air Quality Permit No. 3714-147-12500 is attached. If you have any questions or comments concerning this matter, please do not hesitate to contact me at (404) 363-7097.

Sincerely,

**Kirk Drucker
VOC Unit Manager

AIR QUALITY PERMIT

Permit No.
3714-147-12500

Effective Date

JUL 16 1997

In accordance with the provisions of the Georgia Air Quality Act, O.C.G.A. Section 12-9-1, et seq and the Rules, Chapter 391-3-1, adopted pursuant to or in effect under that Act,

UNISIA OF GEORGIA CORPORATION
1000 Unisia Way
Monroe, Georgia 30655

is issued a Permit for the following:

Construction and operation of an automobile parts manufacturing facility including one spray paint booth and air pollution control equipment. Facility Description is attached.

Facility located at: 1000 Unisia Way
Monroe, Walton County, Georgia

This Permit is conditioned upon compliance with all provisions of The Georgia Air Quality Act, O.C.G.A. Section 12-9-1, et seq, the Rules, Chapter 391-3-1, adopted or in effect under that Act, or any other condition of this Permit.

This Permit may be subject to revocation, suspension, modification or amendment by the Director for cause including evidence of noncompliance with any of the above; or for any misrepresentation made in the application dated June 6, 1997, supporting data received, entered therein or attached thereto, or any subsequent submittals or supporting data; or for any alterations affecting the emissions from this source.

This Permit is further subject to and conditioned upon the terms, conditions, limitations, standards, or schedules contained in or specified on the attached 4 page(s), which page(s) are a part of this Permit.

Director
Environmental Protection Division

General Requirements

1. At all times, including periods of startup, shutdown, and malfunction, the Permittee shall to the extent practicable maintain and operate this source, including associated air pollution control equipment, in a manner consistent with good air pollution control practice for minimizing emissions. Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Division which may include, but is not limited to, monitoring results, opacity observations, review of operating and maintenance procedures, and inspection of the source.
2. The Permittee shall conduct or cause to be conducted appropriate compliance testing when so directed by the Division. Compliance tests may include sampling and chemical analysis of materials containing volatile organic compounds. All results shall be submitted to the Division within 30 days of the completion of testing. Tests shall be performed and conducted using methods and procedures which have been previously approved by the Division.

Allowable Emissions

3. The Permittee shall not discharge or cause the discharge into the atmosphere from the Facility any single hazardous air pollutant which is listed in Section 112 of the Clean Air Act, in amount equal to or exceeding 10 tons (or any lesser quantity for a single hazardous air pollutant that the U.S. EPA may establish by rule) during any 12 consecutive months, or any combination of such listed pollutants in amount equal to or exceeding 25 tons during any 12 consecutive months.

Process and Control Equipment

4. Routine maintenance shall be performed on all air pollution control equipment. Maintenance records shall be recorded in a permanent form suitable and available for inspection by the Division. The records shall be retained for at least five years following the date of such maintenance.

Fugitive Emissions

5. The Permittee shall take all reasonable precautions with any operation, process, handling, transportation, or storage facilities to prevent fugitive emissions of air contaminants.

Notification, Reporting and Recordkeeping

6. The Permittee shall maintain monthly usage records of all materials containing volatile organic compounds. These records shall include the total weight of each material used or containerized waste material disposed, and the volatile organic compound content of each material or waste (expressed as a weight percentage). All calculations used to figure usages should be kept as part of the monthly record. These usage records shall be kept available for inspection or submittal for five years from the date of record.
7. The Permittee shall use the monthly usage records required in Condition 6 to calculate total uncontrolled monthly volatile organic compound emissions.
8. The Permittee shall maintain monthly usage records of all materials containing one or more listed hazardous air pollutants. These records shall include the total weight of each material used or containerized waste material disposed, and the amount of each listed hazardous air pollutant contained in each material or waste (expressed as a weight percentage). All calculations used to figure usages should be kept as part of the monthly record. These usage records shall be kept available for inspection or submittal for five years from the date of record.
9. The Permittee shall use the monthly usage records required in Condition 8 to calculate total uncontrolled monthly emissions of each listed hazardous air pollutant. The Permittee shall notify the Division in writing if emissions of any individual hazardous air pollutant exceeds 0.83 tons or if emissions of all listed hazardous air pollutants combined exceed 2.08 tons during any calendar month. This notification shall be postmarked by the fifteenth day of the following month and shall include an explanation of how the Permittee intends to maintain compliance with the emission limit in Condition 3.

Circumvention

10. The Permittee shall not build, erect, install or use any article, machine, equipment or process the use of which conceals an emission which would otherwise constitute a violation of an applicable emission standard. Such concealment includes, but is not limited to, the use of gaseous diluents to achieve compliance with an opacity standard or with a standard which is based on the concentration of a pollutant in the gases discharged into the atmosphere.

Modifications

11. The Permittee shall give written notification to the Division when there is any modification to this source. This notice shall be submitted sufficiently in advance of any critical date involved to allow sufficient time for review, discussion, and revision of plans, if necessary. Such notice shall include, but not be limited to, information describing the precise nature of the change; modifications to any emission control system; production capacity and pollutant emission rates of the plant before and after the change, and a completed application for any modification not exempted under Paragraph 391-3-1-.03(6) of the Rules.

Special Conditions

12. At any time that the Division determines that additional control of emissions from the facility may reasonably be needed to provide for the continued protection of public health, safety and welfare, the Division reserves the right to amend the provisions of this Permit pursuant to the Division's authority as established in the Georgia Air Quality Act and the Rules adopted pursuant to that Act.
